Dedicated and highly motivated Software Developer with a passion for high-quality software development and a strong drive to contribute to your company's mission. Bringing experience in Java, Spring Framework, Node.js, Angular/React, and RESTful APIs. I am confident in my ability to design and develop efficient and scalable software solutions that meet the needs of your organization.

WORK EXPERIENCE

Software Developer Intern · 03/2022 – 06/2022
Porto, Portugal

Helped develop a platform for municipalities in Portugal to recruit public workers using a CRM called Creatio and an ERP called Odoo.

- Specified requirements and documentation for the project, resulting in improved clarity and efficiency of project execution.
- Built UML Diagrams for database specification and information sequence.
- Designed BPMN processes for the Creatio platform, working on a total of 11 processes.
- Facilitated service communication between Odoo and Creatio via 9 web services.
- Clarified Odoo module dependencies for platform and developed a custom Python module for the job candidate.

Web Designer Intern · 06/2018 – 09/2018
São João da Madeira, Portugal

- Improved office environment with innovative wall sticker designs, resulting in a 20% increase in employee productivity.
- Elevated user experience by designing UI/UX mockups for the company's website rebranding.
- Designed newsletter templates for company emails, creating mockups for 10 different email templates.
- Built website for product catalogue using HTML5, CSS3, JavaScript and PHP.
